-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on Amendment filed June 14, 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11 is/are pending in the application.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed on June 14, 2006 have been fully considered but that are not persuasive and Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.

Oath/Declaration

2. The oath/declaration filed on December 11, 2003 is acceptable.

Claim Objections

3. Claims 5-6 are objected to because of the following reason:

In claim 5, line 3, and in claim 6, line 4, "a metal" should be -- the metal --. Correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rabinovich (U.S. Patent No. 5,758,816).

Art Unit: 2818

Regarding claim 5, The embodiment of Figs. 1-2 of Rabinovich discloses a method for attaching small components to each other comprising:

placing a solder perform 20 between a first metallic layer 14 and an insulative (ceramic) base 12 (see Figs. 1-2 and col. 2, line 33-col. 3, line 36).

The embodiment of Figs. 1-2 of Rabinovich disclose the features of the claimed invention discussed above, but does not disclose a step of applying a current to the solder perform until the solder perform melts to seal the metal cover to the insulating base.

However, in the embodiment of Fig. 10, Rabinovic discloses a step of applying a current to the graphite heater 200, then heating the solder perform 20 (see Fig. 10 and col. 6, lines 20-46).

Applying an electric current to the heater, the heating the solder perform will be obviously melted and seal the first metallic layer 14 and the insulative base 12 with the lens 10 as shown in Figs. 1-2.

Therefore, claim 5 is obviously rendered over Rabinovic.

Allowable Subject Matter

5. Claim 1-4 and 6-11 would be allowed.

The following is a statement of reason for the indication of allowable subject matter:

Claim 1-4 and 6-11 is considered allowable since the prior art of record and the considered pertinent to the applicant's disclosure does not teach or suggest the claimed invention having a step of applying a current to the solder perform until the solder melts to seal the metal cover to

Art Unit: 2818

the insulating base, wherein the current is applied through conductive vias running through the insulating base.

Claim 6 would be allowable if rewritten or amended to overcome the objection set forth in this Office action.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. (6,040,624, 4,905,275, 4,142,286, US 2004/0114882 A1) are as interested.
